

PACT ACT AND TOXIC EXPOSURE

AGENT ORANGE PRESUMPTIVE CONDITIONS

A field guide to presumptions, exposure evidence, TERA development, and claim pathways.

FIELD REFERENCE

FOUR POINTS TO UNDERSTAND

NEW

PACT ACT ADDITIONS

Hypertension and monoclonal gammopathy of undetermined significance, called MGUS.

CANCER

SELECT CANCERS

Includes listed respiratory, prostate, bladder, blood, and certain other cancers. Exact diagnoses matter.

OTHER

OTHER LISTED DISEASES

Includes type 2 diabetes, Parkinson's disease, ischemic heart disease, and other named conditions.

VERIFY

USE THE CURRENT VA LIST

The list is detailed and may change. Verify the exact condition and any timing requirements.

Apply the exact current law to the individual record. Exposure, screening, health-care eligibility, and disability compensation are related but distinct.
